Alex Vataselu

Senior Frontend Engineer · React · Next.js · TypeScript · React Native

14 years building software: backend first (ASP.NET, C#, PHP), then the web, and for the last five, React, Next.js, TypeScript and React Native. I've shipped products in healthcare, fintech and cultural heritage, on product teams and as an independent contractor covering design and development end to end. My daily workflow is AI-assisted (Claude Code with Figma and GitHub), but every branch still gets tests and review before it ships.

Skills

Frontend
TypeScript
JavaScript
React
Next.js (App Router, RSC)
React Native
HTML
CSS
Tailwind CSS
jQuery

State & data
TanStack Query
Redux
Zustand
GraphQL (Apollo)

Backend
Node.js
REST
PostgreSQL
Prisma
Supabase
Firebase
ASP.NET MVC
C#
PHP
MySQL

Testing & quality
Jest
React Testing Library
Vitest
Playwright
TDD
axe-core

Tooling
Git
GitHub Actions
Vercel
Expo
Sentry
Storybook
Figma

Experience

2025 – now
Remote

Senior Frontend Engineer
Freelance, self-employed

Vitest, Playwright + axe-core, WordPress (@wordpress/scripts), Figma

- Owned each project end to end: brand identity and UI in Figma, then build, Vitest and Playwright + axe-core testing, and launch. One point of contact for design and code.
- **Azuga365** (azuga365.ro): online archive of Azuga's royal and industrial history, with archival research, community interviews, and multimedia.
- **Dincolo de Vacantele Socialiste** (litoralinlucru.ro): archive of holidays in socialist-era Romania, with filtered search and contributor photo collections.

2024 – 2025
Brasov, hybrid

Frontend Engineer, Web & Mobile
Pentalog (Globant), client: Builder.ai

React, React Native, TypeScript, Turborepo, Tailwind CSS, SonarQube, GitHub Actions, Sentry

- Built features for Builder.ai's internal app-building platform, including its UI generation workflows, in a Turborepo monorepo whose shared components, hooks and services served web and mobile.
- Cut onboarding from four weeks to two for the two junior engineers I mentored, through weekly code reviews, component API standards, and hands-on support.
- Caught security hotspots and code smells before production by adding SonarQube quality gates to every PR in the GitHub Actions pipeline.
- Set up Sentry across web and mobile, so production exceptions were caught and fixed within the same sprint.

2021 – 2024
Bucharest, remote

Frontend Engineer, Web & Mobile
TryAngle Labs

React, React Native, TypeScript, Tailwind CSS, Expo, Vercel, GitHub Actions

- Built responsive web and mobile apps from Figma designs, using the Expo SDK to handle offline behaviour and platform differences on mobile.
- Cut design-to-production handoff from days to hours for repeat UI patterns by building the shared component library from scratch: strict prop interfaces, co-located tests, and design tokens matched to Figma.
- Moved releases from irregular manual pushes to consistent, predictable cycles by setting up Vercel and GitHub Actions CI/CD.
- **ElbilAppen** (Innobyte, 2021): built the EV app's screens and charging-station map.

2021 – 2023
Brasov

Frontend Engineer & Designer
Freelance · healthcare, fintech, cultural heritage

- **RecuperareAcasa.ro**: mobile-first physiotherapy home-visit booking on an Atomic Design system, with a multi-step intake form, Google Maps and Resend email.
  Next.js 14, TypeScript, Styled-Components, Firebase, Google Maps, Resend
- **LocalsOnly**: full-stack Next.js and GraphQL platform for local experiences. Cut first load by 40% and redundant API calls by 35% by pairing SSR for SEO with CSR for interactivity.
  Next.js, Apollo Client/Server, GraphQL Codegen, TypeGraphQL, Prisma, PostgreSQL
- **EyeExcellence.ro / OrlRasnov.ro**: healthcare platforms with WCAG 2.1 accessibility work and structured data markup. Organic traffic rose 28% after launch.
  WordPress, PHP
- **ArhiveleLitoralului.ro**: digital archive of the Romanian seaside's history on a custom WordPress theme, searchable by keyword, tag and year.

2017 – 2021

Web Developer L.H.EL (Superland)

- E-commerce on Magento, PrestaShop, Odoo and WordPress for the Superland group.
- Cisco networking, Raspberry Pi deployments and VR/AR device setup.

2013 – 2017

Backend Developer Zega Software

- Eved (2013–2014), an event commerce and procurement platform: backend in ASP.NET MVC 2, C# and jQuery.
- Other web apps on that stack, plus PHP and MySQL: my first backend role.

2012 – 2013

Web Developer Kemblimed

- Designed, built and maintained kemblimed.ro on Wix.
- Network operations for a medical ophthalmology equipment provider.

Earlier

Hardware Technician, Teleplan IBM, Prague

Personal projects

2026

Stremio Skip Intro & Recap, a desktop app feature (in progress)

Node.js, ffmpeg, Chromaprint, React, Jest, Stremio client fork

Finds the intro by matching audio fingerprints across a season, and the recap by matching subtitle lines against earlier episodes. Runs locally, with no third-party database.

2026

Powderino, an iOS powder-tracking weather app

React Native (Expo), TypeScript, TanStack Query, React Native Maps, Vercel, Redis, Jest

Ranks 3,000+ ski resorts by fresh and incoming snow, alerts you when a starred resort gets a dump, and adds radar, wind and snow map layers and webcams.

Since 2024

ReAMP, a unified dual-deck DJ interface

Next.js 15, React 19, TypeScript, NextAuth, Prisma, Spotify SDK, YouTube API

Unifies Spotify and YouTube in one playback engine; playback logic is pure functions, testable in isolation and kept apart from React.
